Sorry Jamey, please send me the e:mail that Rob sent to HQ as I am not sure I that I authorized that. I may need to have a talk with him on this. Thanks, Heather

p.s. Heather, I just found your email from Oct 7 forwarding me the letter to Running Grass. Thank you for that and please do continue to cc: me on official correspondence. I guess what I saw was a subsequent email chain from Rob to a bunch of HQ and management folks which I wasn't included on. Again, not a biggie, but it does make my life easier if I can keep track of who is getting what. Thanks again.

Importance: High

Hi Rob and Heather-

I hope this email finds you both well. Thank you for the letter to our EJ coordinator Running Grass re: Chuitna. I am pleased you have reached out to such a valuable resource at R10. I had recently asked Running Grass to serve on our review team for the SEIS, so your letter is very timely.

If at all possible, it would be great if you guys could cc: me on any and all official/letterhead correspondence to EPA management/staff. I just learned of the letter yesterday through several colleagues/management, and upon looking at the email chain it appears the letter was sent to nearly everyone in the Region aside from me, which is unfortunate because as the project manager for the Region is puts me in a bad position to be in the dark about things like this and being forwarded such correspondence from management. It also creates additional work for everyone to try and track down who has it, who needs it, and how to coordinate a response, when we are all trying to gear up and get the review team ready for the preliminary draft.

Not a big deal, but after working with you both on this project for the last several years I would appreciate the professional courtesy of being cc'd on official correspondence, particularly when it is sent to such a large group of EPA folks and my role has been clear since I began working on this project nearly 6 years ago.

Thank you both in advance for your future attention to this matter and feel free to call me anytime.
